

## Invitation to Apply to ESA BIC Denmark

Reference: ESA BIC Denmark Open Call – Issue B, 14/03/2023

Thank you for your interest in ESA BIC Denmark.

The European Space Agency (ESA), together with its Member States, supports entrepreneurs with the ambition to exploit space technology or utilise space systems in non-space markets, or become suppliers to the space sector, e.g. by exploiting non-space technology in the space market.

Together with its local partners, ESA manages a network of Business Incubation Centres (ESA BICs) across Europe. In Denmark, The Technical University of Denmark (DTU) is responsible for managing ESA BIC Denmark. The locations where start-ups can be incubated are at DTU in Kgs. Lyngby, Aarhus University and Aalborg University.

ESA BIC Denmark offers a comprehensive package of support to start-ups selected for incubation, including office accommodation, incentive funding, technical support, business coaching, and legal/IPR advice to the start-ups selected for incubation.

ESA BIC Denmark hereby invites you to submit your application for business incubation. This document provides an introduction to the application and evaluation process and contains references to the templates that should be used when applying.

Please contact ESA BIC Denmark for any further questions.

Yours sincerely,  
Sune Nordentoft Lauritsen  
Managing Director  
ESA BIC Denmark

### Introduction

The purpose of this Open Call for ESA BIC Denmark is to inform about the opportunity for space-related start-ups to become incubated in ESA BIC Denmark and to provide the material and guidance needed to apply for incubation.

Selection and evaluation of applications are scheduled periodically. See [www.esabic.dk](http://www.esabic.dk) for details.

The Call is permanently open and has no closing date for the submission of applications unless the ESA BIC Denmark has indicated otherwise.

### Who can apply?

In general, any space-related start-ups in Denmark not older than five years or natural persons with the intention to set up a space-related start-up are welcome to apply for incubation.

However, some further criteria apply. These can be found in the Cover Letter Template of the application documents. In particular, note the following:

- The application needs to have a valid *space connection*. In general terms, it must be evident that “space” (space technology or a space-based service such as satellite communication, navigation or earth observation) is needed. Alternatively, it must be evident that the proposed technology or service fulfils a need in a space context. It is strongly recommended that ideas related to performing activities or using technology in space are verified by a third party before applying. In case of doubt, please contact the ESA BIC for further guidance.
- Applicants need to run their start-up at their own risk. In practice, this means that more than half of the shares must be owned by the entrepreneur(s) that apply to the ESA BIC.
- In case the application is done by natural persons, these need a permanent working permit in Denmark. Also, the process of setting up a company must have been started. The application shall include details about the status, the intended legal structure, and the distribution of the shares. An incubation contract can only be signed with a legal entity.

## How to apply

Please make sure you have received the following documents, which are part of the Open Call documentation:

- Cover Letter including Requirement Checklists
- Business Plan
- Incubation Proposal
- Draft Incubation Contract
- Draft Rental Agreements (available upon request to ESA BIC Denmark)

Make sure to fill in all required sections in the application templates and pay particular attention to the following:

- Instructions inside the documents (**highlighted in blue in each template**) shall be followed in order to fulfil all pre-conditions of the Open Call and for the application to be accepted.
- Please read the Draft Incubation Contract carefully. The Cover Letter must include a clear, explicit and unambiguous statement declaring that the applicant has read, understood and accepted the terms and conditions contained in the contractual documentation (this is part of the Cover Letter template). Modifications or amendments to the Incubation Contract may only be done in exceptional cases. Please contact the local ESA BIC Manager for guidance.
- Make sure the Cover Letter and the Requirement Checklists are signed by either the majority shareholder or by shareholders with a combined ownership in excess of 50%.
- The incubation proposal should include details on how the incentive funding is meant to be spent. As a general rule, the incentive funding has a ceiling of 50.000,- EUR. It can only be spent in Denmark, may not be used for direct labour costs, and can only be used for product development and IPR. Please see the Draft Incubation Contract for details.
- Incubation in ESA BIC Denmark may be requested for a maximum of 24 months.

Please submit the application documents in electronic form (pdf, maximum three files, one for each required document) to the following e-mail address: [applications@esabic.dk](mailto:applications@esabic.dk) with the subject “ESA BIC Denmark Open Call”.

ESA BIC Denmark will verify the identity of applicants. You are requested to send digital copies of a passport, etc. in a separate file together with your application.

Any questions related to the submission of proposals should be sent to the same e-mail address: [applications@esabic.dk](mailto:applications@esabic.dk).

## The evaluation procedure

The evaluation of all received applications is managed locally by ESA BIC Denmark and follows common ESA BIC procedures.

Once a published submission deadline has passed, ESA BIC Denmark first assess the formal aspects of applications received before the submission deadline. If non-compliance of a minor nature is found, the applicant may be asked to address this in an updated proposal within 48 hours. If the proposal is found non-admissible, the applicant will be informed and the reason will be explained. In such a case an applicant is eligible to submit a revised proposal at a later date.

If the application is compliant with the formal requirements, applicants will be invited to hold a presentation to the ESA BIC Denmark evaluation board. The evaluation will typically take place a few weeks after the submission deadline. The evaluation board consists of representatives of ESA BIC Denmark, ESA, Innovation Fund Denmark, Denmark's Export and Investment Fund and other experts. There will also be an opportunity for the evaluation board to ask questions to the applicant.

The application and the presentation will be marked against the criteria in Table 1, taking weighting factors into account.

Criteria	Weighting factor
Background and Experience <ul style="list-style-type: none"> <li>• Experience and team composition</li> <li>• Support entities</li> <li>• Vision</li> </ul>	25%
Technology/Service <ul style="list-style-type: none"> <li>• Space Connection</li> <li>• Technical feasibility of the product/service to be developed</li> <li>• Production development strategy</li> <li>• Intellectual Property strategy</li> </ul>	20%
Value proposition & Market <ul style="list-style-type: none"> <li>• Value proposition</li> <li>• Market</li> <li>• Competition</li> </ul>	20%
Business Modelling and Risk <ul style="list-style-type: none"> <li>• Revenue model</li> <li>• Finance</li> <li>• Risk</li> </ul>	15%
Activity proposal <ul style="list-style-type: none"> <li>• Quality of the application</li> <li>• Milestones/Cost-planning</li> <li>• Work break-down</li> <li>• Management</li> <li>• ESA BIC investment opportunity</li> </ul>	20%

Table 1: ESA BIC evaluation criteria and weighting factors.

All applicants will be notified in writing about the outcome of the evaluation. The applicant may require, within 10 calendar days from the receipt of the notification, an oral debriefing explaining the reason why the application was successful or not.

ESA BIC Denmark will enter into contract negotiations with successful applicants, taking the comments of the evaluation board into account. ESA BIC Denmark has the right *not* to place a contract if, three months after the notification to a successful applicant, no contract still has been signed, and this is because of a reason for which the applicant can be held accountable.

Additionally, ESA BIC Denmark has the right not to place a contract in case the (intended) legal entity presented in the application is different from the actual established and registered legal entity.

Furthermore, we kindly ask you to pay attention to the following:

- Please note that applications will be treated as confidential. However, the applicant's idea may through this application fall into the public domain (e.g. if local laws require so). Therefore, we strongly recommend that the applicant discusses the protection of his/her idea with a dedicated expert in this field prior to application, and – if relevant – takes appropriate steps to protect the idea (e.g. by applying for a patent).
- As far as allowed by law, any title held by the applicant to his/her idea shall remain vested in him/her. An application to ESA BIC Denmark will not result in the acquisition of any title whatsoever to the idea. *However, ESA retains a right to use the Intellectual Property in specific cases. Please read the detailed conditions described under the section "Use of Intellectual Property Rights" in the Draft Incubation Contract.*
- No expenses incurred in either stage of the application procedure will be reimbursed to the applicant by ESA BIC Denmark, ESA and/or any third party.
- This Open Call does not impose any obligation upon ESA BIC Denmark to enter into negotiations with any applicant.
